Abiotic Stress Physiology of Horticultural Crops

Abiotic Stress Physiology of Horticultural Crops

This book brings together recent advances in the area of abiotic stress tolerance in various vegetables, fruit crops, plantation crops and tuber crops. The main challenges to improving the productivity of horticultural crops are the different types of abiotic stresses generally caused by climate change at the regional and global level. Heat, drought, cold and salinity are the major abiotic stresses that adversely affect growth and productivity and can trigger a series of morphological, physiological, biochemical and molecular changes in various horticultural crops.

To date, there are no books covering horticultural crop-specific abiotic stress tolerance mechanisms and their management. Addressing that gap, the book is divided into 2 sections, the first of which highlights recent advances in the general aspects of abiotic stress tolerance like the role of hormones, reactive oxygen species, seed treatments, molecular mechanisms of heat tolerance and heavy metal toxicity, while the second focuses on the abiotic stress tolerance mechanisms of various vegetables, fruit crops, plantation crops and tuber crops. It includes comprehensive discussions of fruit crops like mango, grapes, banana, litchi and arid zone fruits; vegetables crops like tomato, capsicum, onion and tuber crops; and plantation crops like coconut, areca nut, oil palm and black pepper. Among the strategies for plant stress survival, examples of both avoidance and tolerance relevant to particular crops are examined in detail, supported by selected comprehensive case studies of progress. As such, the book offers a valuable resource suited for scientists and graduate students working in the fields of crop improvement, genetic engineering, and the abiotic stress tolerance of horticultural crops.

From reader reviews:

Karen Keegan:

Book will be written, printed, or highlighted for everything. You can know everything you want by a publication. Book has a different type. As we know that book is important point to bring us around the world. Next to that you can your reading ability was fluently. A guide Abiotic Stress Physiology of Horticultural Crops will make you to end up being smarter. You can feel more confidence if you can know about every thing. But some of you think that will open or reading a new book make you bored. It is not make you fun. Why they can be thought like that? Have you trying to find best book or ideal book with you?

William Ullrich:

As people who live in typically the modest era should be upgrade about what going on or information even knowledge to make these people keep up with the era and that is always change and move forward. Some of you maybe can update themselves by looking at books. It is a good choice for you personally but the problems coming to a person is you don't know which you should start with. This Abiotic Stress Physiology of Horticultural Crops is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

Marlene Tiggs:

People live in this new moment of lifestyle always attempt to and must have the time or they will get lots of stress from both lifestyle and work. So , whenever we ask do people have spare time, we will say absolutely indeed. People is human not just a robot. Then we request again, what kind of activity have you got when the spare time coming to you actually of course your answer will certainly unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative inside spending your spare time, typically the book you have read will be Abiotic Stress Physiology of Horticultural Crops.

Eunice Nunn:

As we know that book is essential thing to add our expertise for everything. By a guide we can know everything we really wish for. A book is a pair of written, printed, illustrated or maybe blank sheet. Every year had been exactly added. This publication Abiotic Stress Physiology of Horticultural Crops was filled in relation to science. Spend your time to add your knowledge about your technology competence. Some people has distinct feel when they reading a new book. If you know how big benefit of a book, you can experience enjoy to read a book. In the modern era like at this point, many ways to get book which you wanted.
