EXPLORING PROBLEMS WITH ORIGIN OF THE UNIVERSE THEORIES

What if you knew the answers to most cosmological problems that theoretical physicists keep from the public?

What if you could impress your colleagues, teachers, friends with your cutting edge analysis?

Amazon Bestselling author, Pierre St. Clair, examines present theories of the universe like an attorney in a court of law.

Cosmology on Trial presents the remarkable findings of his study and introduces readers to unexplained and unsolved mysteries of the universe, without complex jargon.

The author's approach is, "Just the facts, please. Show me the evidence."

Based on survey research, interviews, and papers by the luminaries in astrophysics - including Stephen Hawking, Paul Davies, Max Tegmark, Brian Green, Edwin Hubble, and Alex Filippenko - St. Clair answers the question: is Big Bang cosmology a true account or a cover up of unsolved anomalies in order to preserve the status quo?

SCIENTIFIC JOURNALS REVEAL MAJOR DISAGREEMENTS ABOUT THE UNIVERSE

A ring of nine cataclysmic gamma ray bursts (GRBs) five billion light years across challenges current theories about the universe*

On August 4, 2015, **Professor Lajos Balasz** announced to the press, "this structure contradicts the current models of the universe."

Balasz's investigating team at the Konkoly Observatory in Budapest is trying to establish if known processes of galaxy formation formed the ring's structure.

If not, present theories of the evolution of the universe will need a radical revision.

*Published in the Monthly Notices of the Royal Astronomical Society.

The May/2014 issue of Scientific American highlighted another major calamity

* theorists working in particle physics admit they're in a state of "confusion"

* there is "widespread panic" that particle physicists may be barking up the wrong tree

* to resolve the "crisis in physics" science periodicals, forums, and blog posts suggest revising fundamental principles

"Theoretical physics is at a crossroads right now...In a sense we've entered a very deep crisis."

Dr. Neil Turok - Director of the Perimeter Institute for Theoretical Physics

Renowned physicist, **Dr. Lee Smolin**, is pushing for a new paradigm in astrophysics:

"We need to make a clean break and embark on a search for a new kind of theory that can be applied to the whole universe - a theory that avoids the confusions and paradoxes, answers the unanswerable questions, and generates genuine physical predictions for cosmological observations."

Newtonian physics, General Relativity, Quantum Mechanics, and String Theory have still not proven whether gravity is a wave, a graviton particle, or even a fabric of spacetime.

The Standard Model of physics doesn't even include gravity, dark matter, dark energy, or consciousness.

Author Pierre St Clair digs behind the headlines to update the public about the current crisis

- The most important initiative which physicists ignore
- The five biggest myths of cosmology not supported by observation or data
- NASA physicists admit 96% of the matter and energy in the universe is unknown
- Science only understands 4% of the universe?

"As a scientist, and as an educator, I like the idea that we believe things because there's evidence."

Dr. Richard Dawkins - Oxford University Professor/Bestselling Author
