## **Points and Lines: Characterizing the Classical Geometries (Universitext)** Ernest E Shult

The classical geometries of points and lines include not only the projective and polar spaces, but similar truncations of geometries naturally arising from the groups of Lie type. Virtually all of these geometries (or homomorphic images of them) are characterized in this book by simple local axioms on points and lines. Simple point-line characterizations of Lie incidence geometries allow one to recognize Lie incidence geometries and their automorphism groups. These tools could be useful in shortening the enormously lengthy classification of finite simple groups. Similarly, recognizing ruled manifolds by axioms on light trajectories offers a way for a physicist to recognize the action of a Lie group in a context where it is not clear what Hamiltonians or Casimir operators are involved. The presentation is self-contained in the sense that proofs proceed step-by-step from elementary first principals without further appeal to outside results. Several chapters have new heretofore unpublished research results. On the other hand, certain groups of chapters would make good graduate courses. All but one chapter provide exercises for either use in such a course, or to elicit new research directions.

### **From reader reviews:**

#### **Karon Hall:**

With other case, little individuals like to read book Points and Lines: Characterizing the Classical Geometries (Universitext). You can choose the best book if you appreciate reading a book. Given that we know about how is important a new book Points and Lines: Characterizing the Classical Geometries (Universitext). You can add understanding and of course you can around the world by the book. Absolutely right, simply because from book you can understand everything! From your country until eventually foreign or abroad you may be known. About simple factor until wonderful thing you can know that. In this era, you can open a book or searching by internet device. It is called e-book. You need to use it when you feel uninterested to go to the library. Let's read.

#### **Jeffery Harman:**

People live in this new morning of lifestyle always make an effort to and must have the extra time or they will get wide range of stress from both day to day life and work. So , once we ask do people have spare time, we will say absolutely indeed. People is human not really a robot. Then we request again, what kind of activity have you got when the spare time coming to you actually of course your answer may unlimited right. Then do you try this one, reading guides. It can be your alternative throughout spending your spare time, the actual book you have read is definitely Points and Lines: Characterizing the Classical Geometries (Universitext).

#### **Walter Blankenship:**

You could spend your free time to see this book this publication. This Points and Lines: Characterizing the Classical Geometries (Universitext) is simple to bring you can read it in the area, in the beach, train and soon. If you did not have much space to bring typically the printed book, you can buy the particular e-book. It is make you easier to read it. You can save the particular book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

#### **Eugene Hughes:**

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book has been rare? Why so many query for the book? But just about any people feel that they enjoy regarding reading. Some people likes studying, not only science book but in addition novel and Points and Lines: Characterizing the Classical Geometries (Universitext) or maybe others sources were given knowledge for you. After you know how the fantastic a book, you feel would like to read more and more. Science e-book was created for teacher or students especially. Those guides are helping them to add their knowledge. In different case, beside science publication, any other book likes Points and Lines: Characterizing the Classical Geometries (Universitext) to make your spare time much more colorful. Many types of book like this.
