Sustainable Cities (Regions and Cities)

Graham Haughton, Colin Hunter

Sustainable Cities (Regions and Cities) Graham Haughton, Colin Hunter
Sustainable Cities simultaneously tackles two issues of immediate public concern which also find themselves high on the policy agenda: sustainable environmental development and urban development. The themes of the book - the bringing together of the insights of environmental science, the social sciences and management; the combination of problem analysis with practical application; and a critique of urban environmental problems concentrating on air and water pollution - are illustrated throughout with in-depth material and case studies taken from around the world and are approached from a variety of perspectives: economic, ecological and managerial. Each chapter has a concluding section pointing to key concepts, key reading and a range of discussion points.
