Alfred Tarski: Early Work in Poland-Geometry and Teaching

Alfred Tarski: Early Work in Poland-Geometry and Teaching

Alfred Tarski (1901–1983) was a renowned Polish/American mathematician, a giant of the twentieth century, who helped establish the foundations of geometry, set theory, model theory, algebraic logic and universal algebra. Throughout his career, he taught mathematics and logic at universities and sometimes in secondary schools. Many of his writings before 1939 were in Polish and remained inaccessible to most mathematicians and historians until now.

This self-contained book focuses on Tarski's early contributions to geometry and mathematics education, including the famous Banach–Tarski paradoxical decomposition of a sphere as well as high-school mathematical topics and pedagogy. These themes are significant since Tarski's later research on geometry and its foundations stemmed in part from his early employment as a high-school mathematics teacher and teacher-trainer. The book contains careful translations and much newly uncovered social background of these works written during Tarski's years in Poland.

Alfred Tarski: Early Work in Poland serves the mathematical, educational, philosophical and historical communities by publishing Tarski's early writings in a broadly accessible form, providing background from archival work in Poland and updating Tarski's bibliography.

From reader reviews:

James Williamson:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each publication has different aim or goal; it means that publication has different type. Some people feel enjoy to spend their time to read a book. They can be reading whatever they consider because their hobby will be reading a book. Consider the person who don't like studying a book? Sometime, particular person feel need book once they found difficult problem or perhaps exercise. Well, probably you'll have this Alfred Tarski: Early Work in Poland-Geometry and Teaching.

John Valdez:

The guide with title Alfred Tarski: Early Work in Poland-Geometry and Teaching contains a lot of information that you can discover it. You can get a lot of profit after read this book. This book exist new expertise the information that exist in this reserve represented the condition of the world at this point. That is important to yo7u to know how the improvement of the world. That book will bring you with new era of the the positive effect. You can read the e-book on the smart phone, so you can read it anywhere you want.

Mary Hanlon:

People live in this new day time of lifestyle always aim to and must have the time or they will get lots of stress from both lifestyle and work. So , if we ask do people have time, we will say absolutely of course. People is human not only a robot. Then we consult again, what kind of activity are you experiencing when the spare time coming to an individual of course your answer will unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative in spending your spare time, the book you have read is actually Alfred Tarski: Early Work in Poland-Geometry and Teaching.

Ruth Coleman:

In this period globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. The particular book that recommended for your requirements is Alfred Tarski: Early Work in Poland-Geometry and Teaching this book consist a lot of the information in the condition of this world now. That book was represented how does the world has grown up. The vocabulary styles that writer make usage of to explain it is easy to understand. Often the writer made some analysis when he makes this book. Here is why this book suitable all of you.
