Performance-Based Fire Engineering of Structures

Yong Wang, Ian Burgess, Frantisek Wald, Martin Gillie

Performance-Based Fire Engineering of Structures Yong Wang, Ian Burgess, Frantisek Wald, Martin Gillie

Major events—notably the Broadgate fire in London, New York’s World Trade Center collapse, and the Windsor Tower fire in Madrid—as well as the enlightening studies at the Cardington fire research project have given international prominence to performance-based structural fire engineering. As a result, structural fire engineering has increasingly attracted the interest not only of fire and structural engineers but also of researchers and students. And studies in recent years have generated a vast number of findings.

Performance-Based Fire Engineering of Structures summarizes the latest knowledge on performance-based approaches to structural fire engineering, enabling readers to critically assess research in the field. Whereas most recent books have been mainly concerned with dissemination of principles encapsulated in established codes of practice such as the Eurocodes, this work addresses in depth:

- Global structural behaviour and modelling
- Progressive collapse of structures in fire and the importance of connection robustness
- The integrity of compartmentation in fire
- Structural fire engineering under realistic fire conditions and its implications for material properties
- The limitations of research results and design methods
- The unexploited potential for advanced fire engineering design

This authoritative book draws on the work of internationally active researchers who were core members of the European Network project’s COST C26 working group on fire resistance. It helps readers develop a thorough understanding of how to use advanced fire engineering design to improve structural safety and reduce construction costs.

From reader reviews:

Robin Almeida:

Book is to be different for each grade. Book for children until eventually adult are different content. As we know that book is very important normally. The book Performance-Based Fire Engineering of Structures was making you to know about other know-how and of course you can take more information. It is quite advantages for you. The e-book Performance-Based Fire Engineering of Structures is not only giving you a lot more new information but also to get your friend when you truly feel bored. You can spend your spend time to read your e-book. Try to make relationship using the book Performance-Based Fire Engineering of Structures. You never sense lose out for everything should you read some books.

Cathrine Hart:

As a pupil exactly feel bored to help reading. If their teacher expected them to go to the library or make summary for some e-book, they are complained. Just minor students that has reading's spirit or real their interest. They just do what the teacher want, like asked to go to the library. They go to right now there but nothing reading really. Any students feel that studying is not important, boring in addition to can't see colorful photos on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Performance-Based Fire Engineering of Structures can make you feel more interested to read.

Joseph Sutton:

What is your hobby? Have you heard this question when you got students? We believe that that query was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. So you know that little person similar to reading or as studying become their hobby. You have to know that reading is very important and book as to be the issue. Book is important thing to include you knowledge, except your teacher or lecturer. You find good news or update about something by book. Different categories of books that can you take to be your object. One of them is actually Performance-Based Fire Engineering of Structures.

Leonard Vega:

Some individuals said that they feel fed up when they reading a guide. They are directly felt the item when they get a half elements of the book. You can choose the book Performance-Based Fire Engineering of Structures to make your own reading is interesting. Your own skill of reading talent is developing when you such as reading. Try to choose easy book to make you enjoy to learn it and mingle the idea about book and reading through especially. It is to be 1st opinion for you to like to available a book and examine it. Beside that the publication Performance-Based Fire Engineering of Structures can to be your brand-new friend when you're experience alone and confuse in doing what must you're doing of their time.
