Learning Mathematics in Elementary and Middle Schools Yvonne M. Pothier, James H. Vance, Nadine S. Bezuk, W. George Cathcart

This K-8, math methods text stresses learner centered meaningful understanding of math concepts before rushing to symbol manipulation. The authors limit historical and theoretical discussions to present clear and succinct practical ideas, strategies, and activities for teaching. Pedagogical links include applied references to the NCTM standards, video presentations of practicing classroom teachers, and an interactive companion website. The text is a manageable length; concise but thorough, presenting key ideas through sample problems and the activity models. NCTM 2000 sampler automatically shrinkwrapped to text beginning in July 2000.

From reader reviews:

Richard Hennessy:

In this 21st millennium, people become competitive in each and every way. By being competitive right now, people have to do something to make these people survive, being in the middle of the crowded place and notice by simply surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yep, by reading a book your ability to survive rises then having a chance to stand up than other is high. For you personally who want to start reading any book, we give you this particular Learning Mathematics in Elementary and Middle Schools book as a beginner and daily reading publication. Why, because this book is more than just a book.

Joshua Stamper:

Playing with family in a park, coming to see the water world or hanging out with pals is a thing that usually you will have done when you have spare time, after that why you don't try a thing that's really opposite from that. A single activity that makes you not experience tired but still relaxing, thrilling like on a roller coaster you are riding on and with the addition of knowledge. Even you love Learning Mathematics in Elementary and Middle Schools, you are able to enjoy both. It is a good combination right, you still would like to miss it? What kind of hang type is it? Oh come on its mind hangout fellas. What? Still don't get it, oh come on its known as reading friends.

Louis McCarthy:

Is it you actually who have spare time after that spend it whole day through watching television programs or just laying on the bed? Do you need something new? This Learning Mathematics in Elementary and Middle Schools can be the reply, oh how come? A fresh book you know. You are and so out of date, spending your time by reading in this brand-new era is common not a nerd activity. So what do these books have that the others?

Jason Davis:

In this particular era which is the greater particular person or who has ability in doing something more are more treasured than other. Do you want to become certainly one of it? It is just simple strategy to have that. What you are related is just spending your time almost no but quite enough to have a look at some books.
